

A large, semi-transparent globe is centered in the background. Overlaid on the globe is a map of Africa and the Middle East, with various countries labeled in capital letters. The map is in a light blue and yellow color scheme.

Denmark – On the Road to a National eCare Continuum

Niels Rossing

www.medcom.dk

The GOAL

Healthcare provision without IT is
unthinkable

- *But remember:*

eHealth is only a tool

the goal is

HEALTH

More than the Electronic Patient Record

- Lab, Image, Clinical, Admin., Billing etc,
- Decision support
- Telemedicine (EU project. 'Renewing Health')
- Health Portals
- Info and Support directly to the patient or frail citizen at home (Ambient Assisted Living)
- Mobile smartphone support (mHealth – EU project)

Nordic Countries Lead the Way

ITIF sept. 2009:

*“Our analysis indicate that three countries—**Denmark, Finland, and Sweden**—are **definitively ahead** of the United States and most other countries **in moving forward with their health IT systems.**”*

The Information Technology and Innovation Foundation (ITIF) is a Washington, D.C.-based think tank with the goal of improving quality of life

Danish Health Sector

5.5 mil. Inhabitants

5 Regions: Health Care
98 Municipalities: Home care

- 60 Public hospitals
- 10 Private hospitals
- 2000 GP clinics
- 1100 Specialists
- 330 Pharmacies

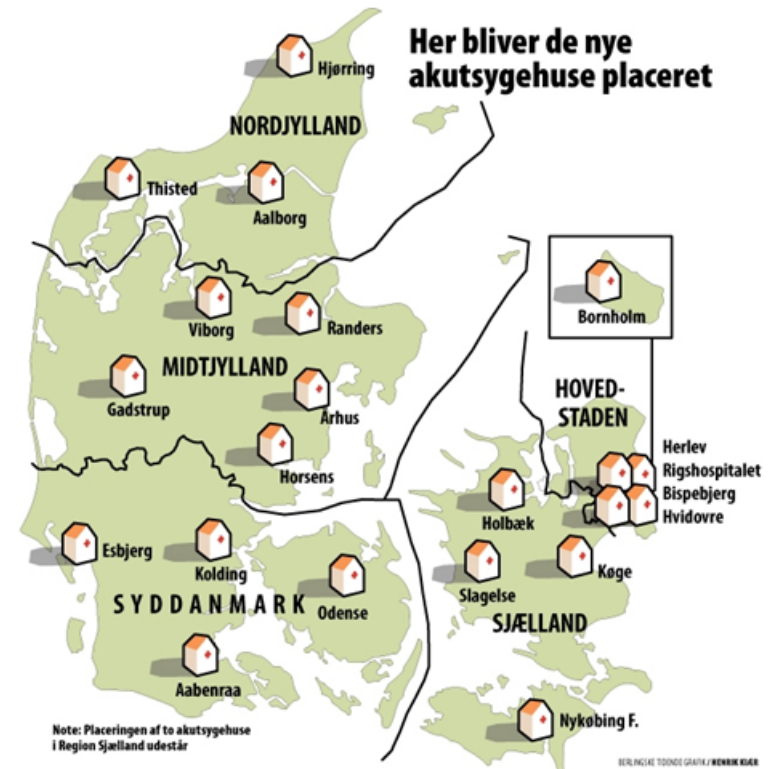

Tax paid
Free of charge

Changing Danish Health Sector

In 2020 we would have..

- 21 large acute hospitals – 5 new
- Elective surgery on specialty hospitals
- Chronically sick in the primary sector

Cornerstones for an e-Care Continuum

- **Infrastructure and Messages** between sectors
- **Interoperability** of systems
- A **Platform** to capture and present data
 - New reference architecture involving Continua under way.
- Retrieving the "hidden" data
- Getting close or into the patient – **Tele**
- Structure and data for **Chronic Care**
- **Coordination and Governance**

Cooperation in eHealth

- **MedCom** - 1994
 - Connecting Health
- **Sundhed.dk** - 2003
 - The Danish Health Portal
- **NSI** – National Health IT - 2008
 - Coordinating eHealth (MOH)
- **RSI** – Umbrella over regions
- All governed by MOH, 5 Regions and 98 Municipalities

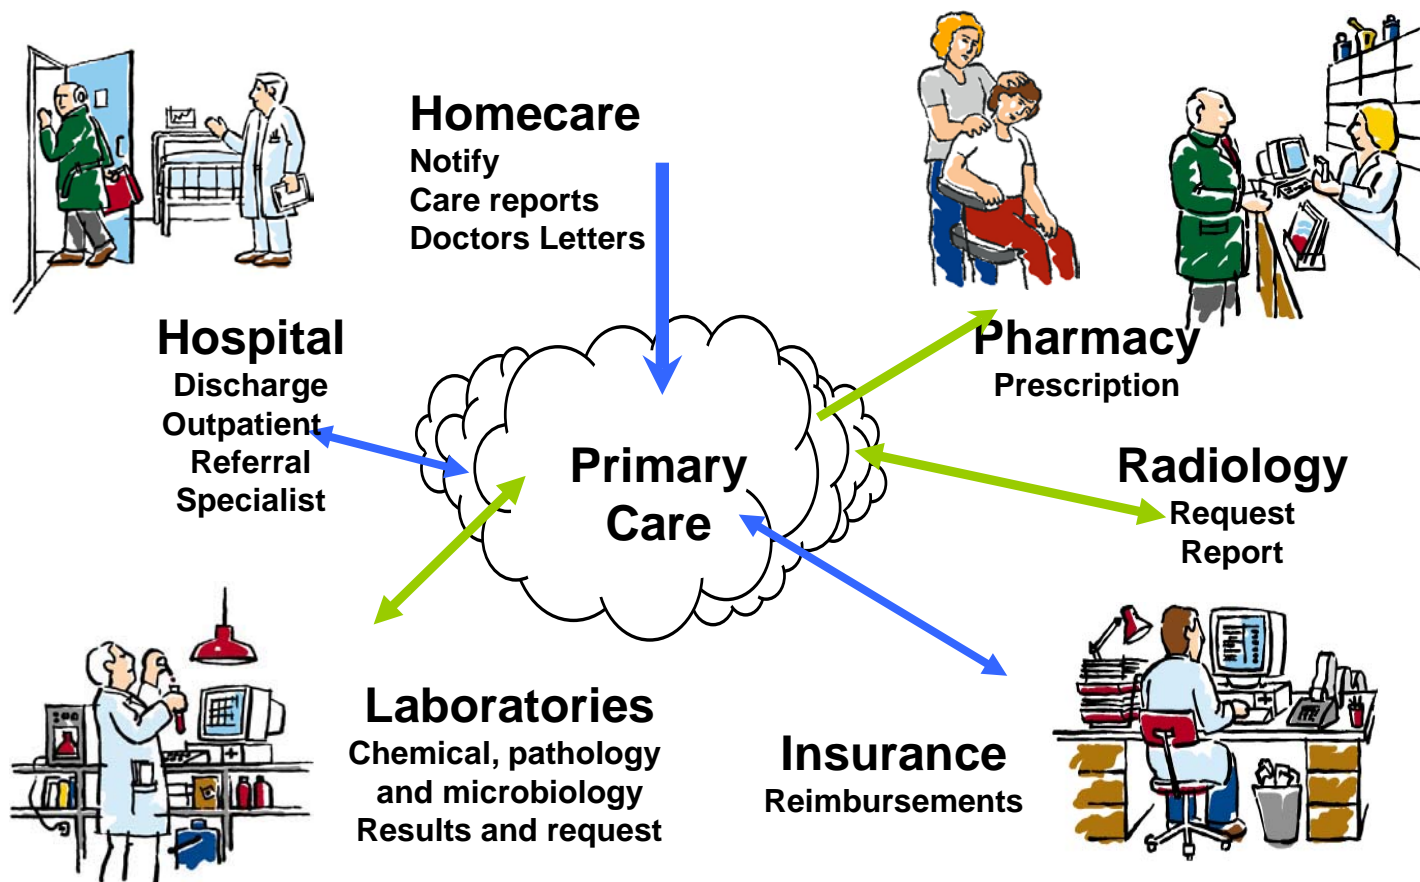

What is Medcom?

*Medcom is a national non-profit project organization developing, testing and disseminating **electronic communication** with primary care in focus via national healthcare **communication standards and profiles.***

And this means....

Today: Connected Health Sectors

eCommunication between sectors

- Electronic messages have to a large extent replaced handwritten messages between GPs and hospitals:

Type of message	% digital
Referrals from GPs to specialized treatment	81 pct.
Discharge letters from hospitals to GPs	99 pct.
Lab test orders and resultats between GPs and labs	99 pct.

Example: Hospital Dischargeletters 2003- 10

Sygehus epikriser 2003 - 10

NSI – National eHealth

- National strategies and plans
- Standards
- Projects
 - epSOS
 - FMK –Shared Medication Rec. **Complete by end 2013**
 - NPI – Access to records, vaccination, radiology . **Still missing**
- Managing MoH IT-solutions

The Challenge of "Hidden" and still Missing Data

Two on-going Projects:

- Finding the data with
 - **a National Patient Index:**
 - Vaccinations
 - Radiology
 - (Lab data)
 - Complete Records
- Completing the Medication History with
 - **A Shared Medication Record (FMK)**

FMK – Shared Medication Data Base

Benefits

- Updated Medicine information – on-line
- Integrated in IT systems
- "automatic" logon
- Everybody working on same database
- Less medication errors

Getting close to or inside the Patient

Telecare – Telehealth – Home Monitoring

Many still not coordinated projects
mainly in:

- Diabetes
- Cardiac failure
- COPD
- Anticoagulation
- Foot and leg ulcers
- Psychiatry

OVERSIGT OVER PEJLEMÆRKER OG STRATEGIENS MÅLSÆTNINGER

Figurforklaring: Her ser du en oversigt over pejlemærkerne og deres relation til de strategiske målsætninger. Fx fremgår det, at pejlemærket for Telepsykiatri bidrager til realiseringen af målsætning 2, 4, 5 og 6. På de følgende sider beskrives de enkelte pejlemærker nærmere.

Future! Chronic Care

- The GP is the Master
- Planned, seamless process between
- Primary Doctor (coordinator)
 - Makes stratification and plan
 - Refers to benefits from municipal and hospital
- Municipality
 - Rehabilitation and education
 - Coordinator for medical complex
- Hospital / Specialist
 - Outpatient Treatment offers
 - Advice to practice
 - Coordinator for social complex
- Patient
 - self-Monitoring
 - self Treatment

Cooperation in eHealth

- **MedCom** - 1994
 - Connecting Health
- **Sundhed.dk** - 2003
 - The Danish Health Portal
- **NSI** – National Health IT - 2008
 - Coordinating eHealth (MOH)
- **RSI** – Umbrella over regions
- All governed by MOH, 5 Regions and 98 Municipalities

But ----

Many Chefs: Benefit and Risks

Benefit:

Avoiding:

- Big Bang Monolithic Failures
- Monopolies

Risks:

- Lack of governance
- Lack of Interoperability and common platform
- Many small failures
- Too small projects/trials to be conclusive
- Nobody to hold responsible

A Growing Market for Health IT

- **EU: From 16 to 18 Billion € in 2012**
 - Health systems
 - Wireless systems
 - Mobile systems
 - Telemedicine and telehealth
 - Ambient Assisted Living

What to do?

- Create Nordic eHealth Market
 - And sell it!
- Create Nordic interoperability
 - -and tell it!
- Revive Nordic eHealth cooperation!
 - A job for Finland?

End
